

BROCCOLI

Long Stem Bastone

Long Stem Broccoli Bastone fits into the same class as the Registered and Trademarked variety Tenderstem. Bastone has very attractive stems with beautiful domed heads that can be used for both export and local markets. Bastone is rich in Vitamins and Iron and is widely adaptable thus making its mark in the culinary world. Bastone is ready to harvest 60-70 days from planting and picking for 4-6 weeks makes it an excellent choice. We recommend planting Bastone at a density of between 40-45m per Ha.
